## APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 50462 Certificate 14166 is issued subject to the terms and conditions imposed in said Permit 50462 Certificate 14166 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 50464 Certificate 13113; 50465 Certificate 13114; 56923, 62274 and 62275 shall not exceed 68.0 million gallons annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.16 cubic feet per second, but not to exceed 2.84 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

February 11, 1998

Proof of completion of work shall be filed before:

March 11, 1998

Application of water to beneficial use shall be filed on or before:

February 11, 1999

Proof of the application of water to beneficial use shall be filed on or before:

March 11, 1999

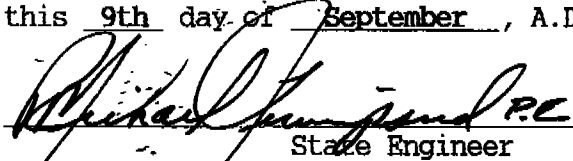

Map in support of proof of beneficial use shall be filed on or before:

**Item 15 - Remarks**

The Permittee recently sold a portion of their land together with 7 million gallons annually of their water rights. This application is being filed as a result of the sale and proposes to move water rights retained by the Permittee out of a well location that has been sold. It also proposes to reduce the place of use to the lands remaining in the ownership of the Permittee.

The proposed point of diversion for this application is the recent redrill of the well under Permit 56923. It is within 300 feet of the permitted point of diversion and is presently being used as the source of water for Permit 56923. Upon approval of this application to change, the permittee proposes to again use the original well as the source for Permit 56923. The new well will be the source of water for this application and the Application to Change Permit 50464, being filed concurrently.
